User access comparison

User	Groups	Policies	Permissions	Ambiguous	Confidence
alice	1	1	1	0	inferred
bob	0	0	0	0	inferred

alice

Evidence	Details	Confidence
User	user-1	Direct
Groups	Auditors	Direct
Implied permissions	read all-resources (tenancy)	Inferred
Relevant ambiguities	0	Requires review

Limitations: This is a policy-text inference, not OCI's final authorization decision.; Dynamic groups do not contain users and are not treated as user access.; Conditions, service-specific permissions, policy inheritance, and runtime context can change effective access.

bob

Evidence	Details	Confidence
User	user-2	Direct
Groups	None	Direct
Implied permissions	None matched	Inferred
Relevant ambiguities	0	Requires review

Limitations: This is a policy-text inference, not OCI's final authorization decision.; Dynamic groups do not contain users and are not treated as user access.; Conditions, service-specific permissions, policy inheritance, and runtime context can change effective access.

Duplicate and overlap candidates

Candidate type	Count
Exact entity names	0
Exact policy statements	0
Near entity names	0

Permissions are inferred from the selected cached snapshot. OCI remains the authority for runtime authorization.
